[shivamjobs@outlook.com](mailto:shivamjobs@outlook.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Senior Backend Engineer with **6+ years** of experience architecting and delivering scalable web applications, RESTful APIs, and enterprise-grade backend systems. Specializes in **PHP (Laravel)**, **Node.js**, **ASP.NET MVC**, and **relational databases** (MySQL, MS SQL Server, PostgreSQL). Currently leading backend development for the **Government of India's Road Asset Management System (RAMS)** — a national highway infrastructure platform serving millions of users.

Proven track record of optimizing system performance, reducing inventory sync errors by **40%**, and building systems serving **5,000+ users**. Expert in **API design**, **database optimization**, **payment gateway integration**, and **AI-assisted development** using ChatGPT, DeepSeek, and GitHub Copilot. Committed to writing clean, maintainable code following SOLID principles and industry best practices.

## CORE EXPERTISE

|                     |                                                                              |
|---------------------|------------------------------------------------------------------------------|
| Backend Development | Core PHP, Laravel, Node.js, Express.js, ASP.NET MVC, C#                      |
| API Development     | RESTful APIs, Webhooks, JSON APIs, API Authentication & Security             |
| Databases           | MySQL, MS SQL Server, PostgreSQL, Oracle, MongoDB                            |
| Database Skills     | Schema Design, Query Optimization, Indexing, Performance Tuning              |
| Architecture        | MVC, OOP, SOLID Principles, Design Patterns, Dependency Injection            |
| Security            | Authentication, Authorization, SQL Injection Prevention, CSRF/XSS Protection |
| Frontend            | React, Bootstrap, jQuery, HTML5, CSS3, AJAX                                  |
| DevOps & Tools      | Git, Docker, AWS (EC2, S3), CI/CD, Composer, Postman                         |
| AI & Automation     | ChatGPT, DeepSeek, GitHub Copilot, Prompt Engineering, Python Scripting      |

## TECHNICAL SKILLS

|                       |                                                                    |
|-----------------------|--------------------------------------------------------------------|
| Programming Languages | PHP, JavaScript, Python, C#, SQL                                   |
| Backend Frameworks    | Laravel, Node.js, Express.js, ASP.NET MVC, .NET Core               |
| Frontend Technologies | React, Bootstrap, jQuery, HTML5, CSS3, AJAX                        |
| Databases & DBMS      | MySQL, MS SQL Server, PostgreSQL, Oracle, MongoDB                  |
| API Technologies      | REST APIs, SOAP, GraphQL, Webhooks, JSON APIs                      |
| DevOps & Cloud        | Git, GitHub, AWS (EC2, S3, RDS), Docker, CI/CD Pipelines           |
| Security & Auth       | JWT, OAuth2, Session Management, Role-Based Access Control         |
| AI Tools              | ChatGPT, DeepSeek, Antigravity, GitHub Copilot, Prompt Engineering |
| Development Practices | Agile, Scrum, TDD, Code Reviews, Unit Testing, CI/CD               |

## EXPERIENCE

|                                                |                       |
|------------------------------------------------|-----------------------|
| Senior Software Developer (Government Project) | August 2025 - Present |
| Cubastion Consulting Pvt. Ltd.                 | Noida, UP             |

- Architecting and developing backend modules for the **Road Asset Management System (RAMS)** — a Government of India initiative under MoRTH managing national highway infrastructure data across distributed systems.
- Designed **RESTful APIs** and secure backend communication layers enabling seamless integration across multiple application modules with high availability requirements.
- Built scalable services using **Laravel**, **ASP.NET MVC**, **C#**, and **MS SQL Server**, with comprehensive **HLD/LLD documentation** for enterprise-grade modules.
- Optimized database performance through **query tuning**, **indexing strategies**, **caching mechanisms**, and **API response optimization**, improving system efficiency by 35%.

- Debugged production issues and enhanced stability for mission-critical government infrastructure systems serving national-level stakeholders.
- Collaborated with cross-functional teams in an **Agile environment**, conducting code reviews and ensuring compliance with government security standards.

## Full Stack Web Developer

*Digitech Solution*

June 2023 - August 2025

*Noida, UP*

- Led backend development for multiple US-based client projects including [HKS Party](#), [Brands and Branches](#), and [Premium Franchise and Locations](#).
- Designed and developed **RESTful APIs** supporting payment processing, user management, inventory, and order lifecycle with **Razorpay** integration for secure transactions.
- Integrated third-party services including shipment providers, SMS gateways, and notification services, reducing manual intervention by 60%.
- Improved backend performance by 40% using **eager loading**, **database indexing**, **caching strategies**, and **query optimization** techniques.
- Mentored 3 junior developers, conducted code reviews, and led Agile sprint planning sessions to ensure timely delivery of features.
- Deployed applications on **AWS EC2** with automated CI/CD pipelines using GitHub Actions.

## PHP Laravel Developer

*Martvalley Services*

July 2022 - June 2023

*Noida, UP*

- Built robust backend systems for **courier tracking**, **inventory management**, and **e-commerce** platforms using Laravel and MySQL.
- Optimized complex MySQL queries, reducing inventory synchronization inconsistencies by **40%** and improving data accuracy.
- Designed and implemented a **College Management System** serving **5,000+ students**, improving administrative efficiency by 30%.
- Automated data processing and reporting workflows using **Python scripts**, saving 15+ hours of manual work weekly.
- Implemented **JWT authentication** and **role-based access control** for secure user management.

## Web Developer

*Indydotinfotech Pvt. Ltd.*

June 2020 - June 2022

*Patna, Bihar*

- Developed PHP-based business applications using **MVC architecture** for school management, e-commerce, and administrative systems.
- Designed relational database schemas and optimized SQL queries, reducing query execution time by 25%.
- Built **RESTful APIs** enabling seamless communication between multiple application modules.
- Participated in debugging, testing, and production deployments, ensuring 99.9% uptime for client applications.

## PROJECTS

### [HKS Party](#) — Event Booking Platform

*Laravel, PHP, MySQL, Node.js*

A comprehensive event booking and party planning platform enabling venue discovery, catering selection, and entertainment services with integrated vendor management.

- Designed REST APIs for vendor onboarding, booking management, customer reservations, and payment workflows with Razorpay integration.
- Implemented a **four-tier role system** (User, Vendor, Staff, Admin) with granular permissions and structured access control.
- Achieved 99.9% transaction success rate through robust error handling and payment verification mechanisms.

## Echelon Realtors — Real Estate Platform

*Laravel, PHP, MySQL, LeafletJS*

A real estate platform providing verified property listings with interactive map-based search for rent and sale properties.

- Built REST APIs supporting property listings, customer lead management, and advanced search functionality.
- Integrated **LeafletJS** for interactive map-based property visualization with geo-location filtering.
- Optimized search queries to handle 10,000+ property listings with sub-second response times.

## Brands and Branches & Premium Franchise

*Laravel, PHP, MySQL, Razorpay*

Franchise discovery platforms connecting aspiring entrepreneurs with premium food and beverage brands for business expansion.

- Developed backend modules for franchise discovery, lead management, and business listing workflows.
- Implemented a **priority-based listing system** with admin-defined rankings for better visibility and lead conversion.
- Built custom franchise management features allowing each franchise owner to manage their own pages and content.

## Internal Backend Monitoring Tool

*Laravel, Node.js, Docker*

An internal monitoring solution for API logging, request tracking, and error diagnostics across distributed services.

- Built centralized logging and debugging workflows for backend services using Elasticsearch and Kibana.
- Implemented performance monitoring modules that identified bottlenecks and improved application stability by 25%.
- Containerized the application using Docker for consistent development and deployment environments.

## EDUCATION

### Master of Computer Applications (MCA)

2018 - 2021

A.N. College, Patliputra University

*Patna, Bihar*

### Bachelor of Computer Applications (BCA)

2013 - 2016

A.B. College, Magadh University

*Gaya, Bihar*

## CERTIFICATIONS

- **Programming for Everybody (Getting Started with Python)** — University of Michigan (Coursera)
  - Credential ID: XKMDA7G7EW6Y 2020
- **Introduction to Relational Database and SQL** — University of Michigan (Coursera)
  - Credential ID: PKXTN9KAFLUY 2020
- **Python Data Structures** — University of Michigan (Coursera)
  - Credential ID: 6R2UU4V9PTMM 2020
- **Capstone: Retrieving, Processing, and Visualizing Data with Python** — University of Michigan (Coursera)
  - Credential ID: JCQH6V3N3WZZ 2020
- **C++ Programming** — IIT Bombay (Spoken Tutorial Project) 2015
